

Muhammad Ismail KT

Full Stack JavaScript Developer

+91-8089471532 | muhammedismailkt@gmail.com | github.com/Ismailkt313 | linkedin.com/in/ismail-kt-7117a3321 | your-portfolio-url.com

Professional Summary

Full Stack JavaScript Developer experienced in building scalable web applications with Next.js, React, TypeScript, Node.js, and Express.js. Skilled in designing REST APIs, implementing authentication systems, and applying Repository Pattern and Modular Monolith Architecture for maintainable backend systems. Experienced with MongoDB and PostgreSQL for both non-relational and relational data modeling. Proficient with the Next.js App Router, Server Components, and Server Actions for building performant, SEO-optimized, and accessible applications. Comfortable building real-time features with Socket.IO and integrating AI APIs into product-oriented workflows, with a consistent focus on clean architecture and performance optimization.

Technical Skills

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Redux Toolkit, Context API, Next.js (App Router)

Backend: Node.js, Express.js, REST APIs, JWT, Refresh Tokens, Socket.IO, Multer, Cloudinary, Server Actions

Database: MongoDB, Mongoose, PostgreSQL

Cloud & DevOps: AWS EC2, AWS S3, IAM, PM2, Nginx, GitHub Actions, CI/CD

Architecture: MVC Pattern, Repository Pattern, Modular Monolith, Layered Architecture, REST API Design

Performance & SEO: Metadata API, Dynamic Routing, Server Components, Image Optimization, Lazy Loading, Code Splitting, Core Web Vitals, SEO Optimization

Tools: Git, GitHub, Postman, VS Code, Figma, Eraser.io

Core Concepts: Authentication, RBAC, Responsive Design, Accessibility (WCAG), Scalable Database Design, System Design Fundamentals

Projects

QuickWork – Trust-Based Service Marketplace *React, TypeScript, Node.js, Express.js, MongoDB, Socket.IO, Razorpay*

- Built a trust-based service marketplace with separate Client, Provider, and Admin roles, structured using Repository Pattern and Modular Monolith Architecture.
- Implemented JWT authentication with refresh tokens and Role-Based Access Control to secure user sessions and protect resource access.
- Developed real-time chat with Socket.IO and integrated Razorpay for payments, wallet management, provider reviews, and notifications.

DevShowroom – Developer Portfolio Platform *React, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS*

- Designed a developer portfolio platform with public profile pages and project showcases using a responsive Tailwind CSS interface.
- Built REST APIs for profile and project management, with image uploads handled through Cloudinary.
- Implemented a dashboard for content management, separated from the public-facing view.

ErrorLens – AI Debugging Assistant *React, TypeScript, Node.js, Express.js, AI APIs*

- Built an AI-powered debugging assistant that analyzes error input and code snippets to identify root causes.
- Integrated AI APIs to generate structured, developer-focused suggestions and explanations for detected issues.
- Designed a structured, consistent response format to improve clarity and usability of AI-generated output.

Personal Portfolio *Next.js, TypeScript, Tailwind CSS*

- Developed a personal portfolio using the Next.js App Router with Server Components and Server Actions for optimized rendering.
- Implemented the Metadata API and dynamic routing to improve SEO and page discoverability.
- Optimized performance and accessibility with a focus on Core Web Vitals and responsive design.

Bootcamp

Brototype – Full Stack JavaScript Development Program

- Completed industry-focused training covering Next.js, React, Node.js, Express, MongoDB, and PostgreSQL.
- Practiced REST API development, authentication flows, and Git-based team collaboration workflows.

Education

Higher Secondary Education – Kerala, India
